

Fascial Anatomy

Prosection and preparatory dissections for the Fascia Plastination Project

with Dr. Robert Schleip & Prof. Carla Stecco

**27.-29. June 2018
at the Plastinarium in Guben, Germany**

This 3-day workshop is conducted as part of the *Fascia Plastination Project* (a cooperative project of the www.fasciaresearchsociety.org, www.fasciaresearch.de and www.plastinarium.com) to prepare the world's first 3D plastinated expression of the human fascial network. This workshop builds upon – but does not require previous participation at – a 5-day dissection workshop already held at the Plastinarium in January 2018.

This 3-day workshop will include the shared preparation of isolated fascial tissues for subsequent plastination (and potential exhibition at the 5th or 6th Fascia Research Congress 2018/2021). This will most likely include dissection of the thoracolumbar fascia, of cranial/nuchal fasciae, as well as of brachial fascia with the continuity of the medial nerve throughout it.

Other parts will consist of educational prosection, in which the teachers demonstrate fascial connections on a formalin fixated body for the participants. Emphasis will be placed on those fascial structures which have a high significance for manual and movement therapists.

Finally, specific anatomical lectures and hands-on palpatory instruction in a seminar room environment will help to bridge the connection between the dissection room and alive fascial tissue properties.

Start: June 27, 2018 at 11:30 am
End: June 29, 2018 at 3:30 pm
Location: Gubener Plastinate, Guben, Germany
www.plastinarium.de/en/visitor_info/anreise_copy.html

Notes:

- We appreciate if you plan your time such that you will arrive on time and can stay until the end.
- Travel time from Berlin city center: via train approx. 2 hrs; by car: 2 hrs – 2 ½ hrs.
- Parts of this workshop will be captured by video/photo recording for a future documentation of this project. With your registration you agree to a potential public usage of these recordings. You are also welcomed to take photo/video recordings yourself and to share them with the group (guidelines will be given at the workshop).
- Housing is available upon request nearby (usually between EUR 22- 30/day). You will receive related info after your registration.
- Recommended literature: Carla Stecco: Functional Atlas of the Human Fascial System (If possible, have this atlas with you during the workshop, as it will be used as frequent resource).

Educational direction: Dr. Robert Schleip (Ulm University, Germany) and Prof. Carla Stecco (Padua University, Italy). They will be assisted by skilled dissectors from the Plastinarium.

Organization & administration: Somatics Academy GbR, www.somaticsacademy.de in collaboration with Fascia Research Group (Ulm Univ.) the Fascia Research Society and the Plastinarium GmbH (www.fasciaresearch.de , www.fasciaresearchsociety.org, www.plastinarium.de)

Course fee: EUR 690,-

For your binding registration please use the enclosed application form.
